

Shown with optional rear mag wheels

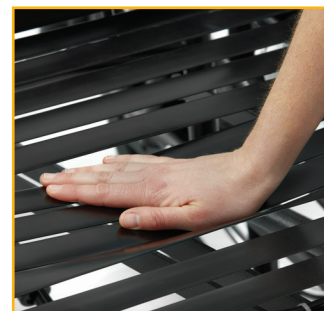

Rocking motion helps calm agitation, creating a soothing effect

Posterior tilt aids in pressure redistribution

Front pivot seat tilt enhances visual orientation and encourages self-mobility with proper foot-on-floor positioning

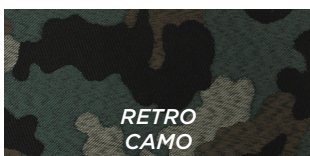

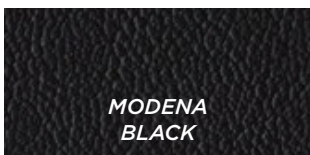

Comfort Tension Seating® improves postural support and sitting tolerance

Patient, Facility, & Caregiver Benefits

- Caregiver activated tilt allows for easy frequent repositioning
- Design provides safety and stability helping to reduce risk of injury
- Rocking provides stimulation; excellent for memory care

UPHOLSTERY OPTIONS

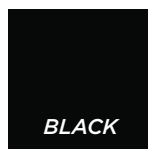

Enhanced mobility and freedom for memory care
