

cotton candy machines

//////////

With quality, durability and ease of use in mind, Paragon’s Cotton Candy Machines feature a 5” all-metal spinning head and a tubular element to prevent sugar from clogging. Paragon’s 1/12 hp motor is completely shielded from sugar exposure to extend its life and allows for easy clean-up. All units are fast and efficient for commercial use with lock down features for portability. Paragon offers four different bases designed to fit the consumer’s needs.

The Sugarcane Hurricane

Afforable and colorful, the Sugarcane features professional controls that include simple switches which turn on power and heat, and a knob that controls minimum and maximum heat providing the operator precision to make perfect cotton candy in any condition and every time.

The Quick Release

A new market innovation - a quick release head - distinguishes this unique cotton candy machine. The patented, revolutionary high performance head will not clog and can be removed without the use of tools. The quick release head enables the user to quickly clean the head between floss flavors with virtually zero downtime (literally a snap and firm tug on the head). Perfect choice for concession stands and high output operations.
