

Acrovyn® Woodgrains

From left: Smoked Rippled Maple, Aged Oiled Walnut, Coastal Teakwood, Shadow Papyrus

Discover our updated Acrovyn® Woodgrains Collection, including a refreshed palette of authentic wood designs in a range of wood tones that is more realistic than ever before. Some of our Woodgrains can even be enhanced with a complementary texture and embossed to create the most authentic wood appearance in wall protection.

In addition to our most loved traditional colors, this carefully curated palette offers tones featuring warmer, natural shades as well as an assortment of warm and cool grays. Combined with a subtle, shallow microtexture, you'll fool even the most discerning eye.

Supplied in up to 4' x 10' sheets in .040" and .060" thickness or can be specified on additional Acrovyn products including wall panel systems, wall protection, and Acrovyn Doors. Our Acrovyn Woodgrains are designed to beautifully coordinate with all CS interior product solutions. Plus, because they're now available with up to 50% post-consumer recycled content, they coordinate with the environment too.
