Specialty Pillows

Neck pillows

A specially designed pillow that supports the neck and head in a natural position. Using a neck pillow can help align and alleviate discomfort of the neck area.

Contour Pillows

Using a contour pillow memory foam model has several benefits from people who suffer from pain, stiffness and discomfort. The most basic benefit is that memory foam cushions the joints and relieves pressure. Contour pillows increase comfort during sleep by supporting the neck.

Body Pillows

Offering full length body support for side sleepers, a body pillow can relieve pressure on lower back, spine and hips.

Positioner Pillows

Can be used to support and position the lower back or lower extremities. This versatile option can also be used to elevate where needed.
