

EZ SERIES 26

THRU-THE-WALL/BUILT-IN AIR CONDITIONERS

PRODUCT INFORMATION

The EZ Series 26 units are designed and manufactured for new construction or the replacement of 26" packaged terminal air conditioning units in an existing building. The product is designed for individually-zoned comfort controlled heating and cooling. We offer our chassis to operate in cooling only, cooling with electric heat, and cooling with heat pump with backup electric heat. The design standards, heavy duty construction and the focus on indoor noise reduction has created our unit as the premier unit of the future.
