

Ensuring residents feel connected—both to their loved ones and to their interests—has never been easier. With senior-friendly iN2L tablets, residents have endless opportunities to learn, have fun, relax, and pursue their interests.

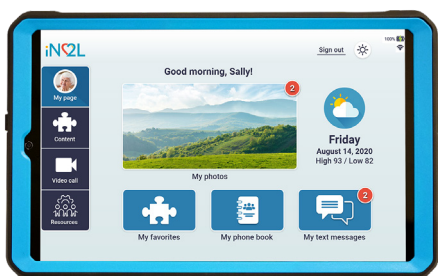

Social Connection

One-touch video calls, simple photo sharing, and texting make it easy for residents to stay connected to family and friends. With the tablet's telehealth capabilities, seniors can participate in live video visits with providers.

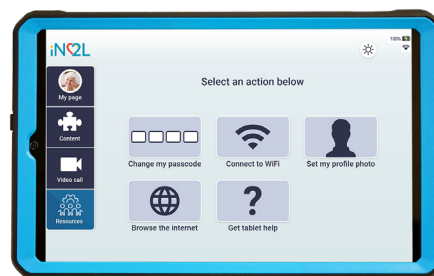

Life Enrichment

Each tablet is preloaded with expertly designed and curated content that is regularly updated, including over 1,000 games, puzzles, movies, audiobooks, and more.

Personalized Experience

Residents' most important things, including personal contacts, photos, and favorite content items, are organized for easy access on each user's homepage.

Simple Design

Simple, intuitive design and instructions at every turn help residents operate the device without staff assistance. There's no need for any previous smartphone or tablet experience.

Put the Power of Connection Into Your Residents' Hands

- Samsung Galaxy touch screen tablet
- Available in WiFi and Cellular + WiFi options
- Full-body protective case with kickstand
- Online support
- FREE virtual training for community staff

Video chat requires a minimum of 1.5 Mbps dedicated bandwidth per call. 2.5 Mbps of dedicated bandwidth per call is recommended for an optimal video call experience.

For the best video call experience, all participants should ensure their smartphone is running the most recent OS and browser versions.

“

Thank you all at iN2L for creating a product that is helping us make lives better. With more need for 1:1 engagement, the residents' individualized pages have helped staff quickly find areas of interest. Video chat with family members is much more important than usual and iN2L has made this readily accessible.
