

Versa MD Leg Extension / Leg Curl

MD-S711

The Versa MD Leg Extension / Leg curl features a low starting weight and incremental weight changes, helping injured or deconditioned clients get started and progress quickly. Range-of-motion limiter restricts the stroke for isometric contractions and protects clients from overextending.

- Smooth, gas-assisted vertical back pad adjustment includes 10-, 20-, 30- and 40-degree positions to provide options for clients with hip mobility restrictions
- Low starting weight of 4.5 kg / 10 lbs for the leg extension and 3.4 kg / 7.5 lbs for the leg curl helps injured or deconditioned clients get started and progress quickly
- Ankle pad adjusts to four positions to provide comfortable use for clients of different sizes
- Compact design combines a space-saving footprint with optimal biomechanics
- Range-of-motion limiter restricts the stroke for isometric contractions and to protect clients from overextending
- Optional incremental weight allows increases as small as 0.9 kg / 2 lbs to help clients of all ability levels see real progress
- Optional step stool helps those with physical limitations enter or exit the unit more easily and safely
- Thigh pad features gas-assisted adjustment to nine positions to provide comfortable use and swings smoothly out of the way for easy entry and exit
- 12 starting positions let individuals adjust the unit to accommodate a wide range of joint flexibility and physical limitations
- Swing arm adjustment pivots the thigh pad out of the in-use area for users
- Unique seat pivot allows proper joint alignment with the machine's axis of rotation, creating optimal biomechanics in both directions
- Gas-assisted horizontal back pad adjustment offers seven positions to provide proper alignment for a range of body types and makes changing positions fluid and easy
- Large instructional placards provide clear instructions for adjustments, helping individuals understand all possible progressions
